CHURCH CLASSES & SUNDAY SCHOOL

STREAM LIVE TV AND VIDEO TO ANY DEVICE IN ANY LOCATION

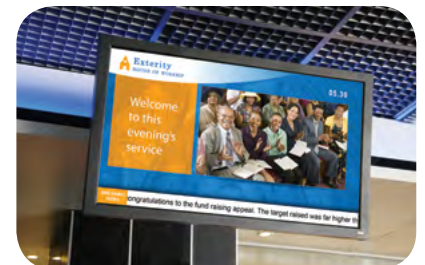

Increase the reach and appeal of your worship services by delivering a dynamic mix of video content and digital signage around the church campus, including live sermons, TV and radio channels, church information and events with Exterity solutions.

Our systems distribute video content to any screen or mobile device wherever there is a network connection, and can support large volumes of content and receiving devices, without compromising system performance.

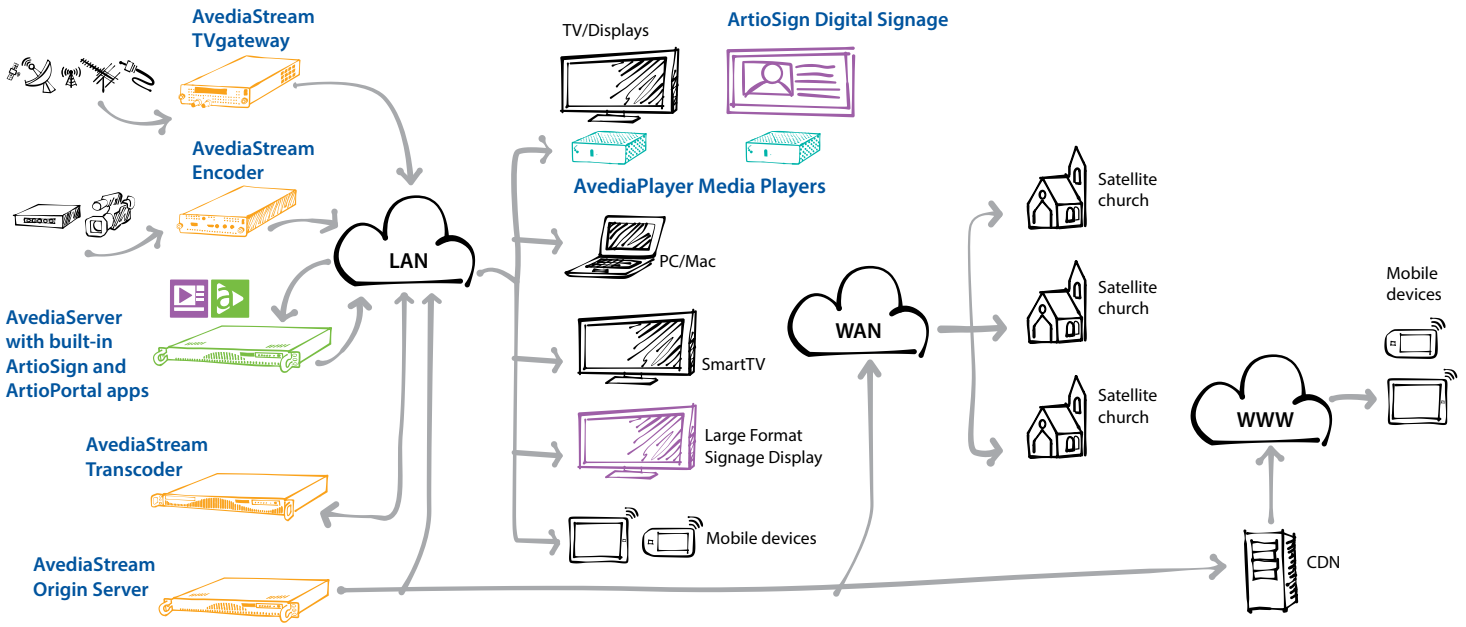

Exterity solutions enable you to extend the reach of church services to overflow and public rooms as well as across multiple campuses and the internet, so worshippers can be part of the service, regardless of their location.

## Exterity Solutions in House of Worship

- Deliver a dynamic mix of high-quality video content, live or on-demand throughout house of worship facilities, as well as to satellite locations and the internet
- Combine IP video with information on upcoming events, church information and important announcements
- Support a growing mobile culture with the ability to extend the reach of IP video to smartphones and tablets
- Easily create a personalized video experience for congregants
- Create your own TV channels for playout around the church campus and externally via the internet
