

IP Video & Digital Signage Solutions for K-12

Engage. Communicate. Inspire

Deliver a wide range of video and signage content around the school campus including live TV and video, emergency messaging, school information, events and much more with Exterity solutions.

Exterity systems increase the flexibility of learning by distributing channels to every TV, Projector, PC or mobile device wherever there is a network connection, and can support large volumes of content and receiving devices without compromising system performance. Administrators can also manage and control the Exterity system from anywhere on the network.

Exterity's integrated digital signage solution enables schools to easily combine TV and video with live news updates and messages to strengthen your overall communications strategy, such as digital menu boards in the lunchroom or displays promoting school events and news.

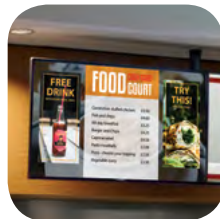

Live events such as graduation ceremonies and sporting events can be streamed around campus as well as via the internet, meaning friends and family can be part of the special day, regardless of their location.

Exterity Solutions in K-12

- Use digital signage to promote school news and events, building directories and lunch menus in common areas
- Increase student engagement with video-based morning announcements that can be delivered across the school
- Deliver TV and video content to TVs, Projectors, PCs and mobile devices in every classroom
- Instantly communicate warnings and special instructions to students, staff and visitors in an emergency
- Share cable TV channels across the School District without having to encode cable set-top boxes
- Stream live events such as graduation ceremonies and sporting events around campus, to mobile devices and the internet

Exterity IP video and digital signage in a K-12 environment

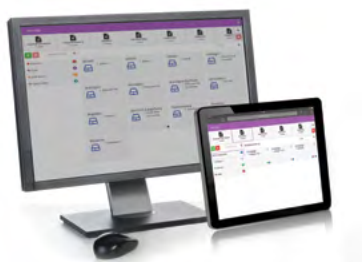

Advantages of Exterity IP video solutions

A feature-rich, fully configurable digital signage and IP video system in one

Flexible and scalable to fit any size of installation and number of fixed and mobile devices. Exterity end-to-end solutions are highly reliable, ensuring a plug-and-play robustness that is second to none

Simple to use and easy to manage; control the Exterity IP video system from anywhere on the network

Exterity ArtioPortal middleware enables schools to offer different screen layouts in each location
