

Keep staff and customers informed with up-to-date transport information for London Underground, Overground, rail, and tram services using ArtioSign's London Transport element.

Simple licence-based activation adds the London Transport element into ArtioSign Create. Drag and drop the element onto the canvas to add it to your digital signage layout.

The screenshot shows the ArtioSign Create interface. At the top, there's a toolbar with icons for Point-of-Sale, PowerPoint, RSS, Text, Twitter, Video, Video List, and Weather. Below the toolbar is a list of transport services with their status: Bakerloo, Central, Circle, District, DLR, Hammersmith & City, Jubilee, London Overground, Metropolitan, Northern, Piccadilly, TfL Rail, Tram, Victoria, and Waterloo & City. To the right, there's a 'London Transport' configuration panel with a 'Resize Info' table:

Resize Info	
Left (px)	Top (px)
1220	20
Width (px)	Height (px)
620	1060

Below this is a 'Global Settings' dialog box with tabs for Approvals, London Transport, Meeting Room, Point of Sale, and Twitter. The 'RSS' section is active, showing fields for API Key (499cd93r443333llj23423lkjl) and APP ID (89ce3004).

Register at <https://api-portal.tfl.gov.uk/signup> to receive a unique API key and App ID. This ensures that the TfL Open Data service does not restrict data at peak times.

The London Transport element updates every minute to ensure that viewers are kept up to date with the latest transport information.
