

Smart Control Application

The AvediaServer® m8105, m8115, m7205, m7305, and m8365 software modules include the Smart Control application. In addition to centralised control of SmartTVs, its drag-and-drop interface provides grouping of devices and publishing of ArtioSign® and ArtioGuest™ content to Exterity Media Players and specific Smart Displays.

Control

Grouping

- Organise devices into control groups for simple publishing to multiple devices
- Drag and drop devices, users or profiles to create/organise control groups
- Unlimited number of control groups
- Unlimited number of devices, users or profiles in a control group

Access

- Access Smart Control from a PC, or from an Apple or Android tablet to manage smart displays, digital signage, and portals on the move

ArtioSign

Configurable User Permissions

- Limit users or profiles to editing or publishing only specific ArtioSign playlists/campaigns to certain control groups/individual devices

Publish Playlists and Campaigns

- Publish any listed playlist or campaign to all or to selected control groups/individual devices

Manage Playlists and Campaigns

- Back up all playlists and campaigns
- Download/upload playlists and campaigns to share between AvediaServers

ArtioGuest

Publish Portals

- Publish ArtioGuest portals to control groups/individual devices

Manage Portals

- Back up all portals
- Download/upload portals to share between AvediaServers

Messaging

- Two types of messages are available:
 - Instant messages - Create a quick message within Smart Control and publish it to selected control groups/individual devices
 - Pre-formatted messages - Select a message created and saved in the AvediaServer Mailbox application and publish it to selected control groups/individual devices
- Message priority selection:
 - Standard - appears in guest inbox
 - Popup - displayed if the screen is on
 - Wakeup - turns on screen and is displayed
- Ability to permit a user to send messages but deny access to other functionality

Control Functions

Apply functions to individual or groups of smart displays

Power

- Turn on and off (to and from standby)

Reboot

- Restart smart displays

Volume

- Set volume, 0 to 100%

Mute

- Mute/un-mute

Channel

- Specify the channel to play
