

See video feeds and converged data streams simultaneously. ArtioMultiview allows users to see the whole content picture on one screen.

Views

- ArtioMultiview administrators can define sets of channel views, each based on a template. Each view can be created with different sets of channels, and has a unique URL allowing licensed client access from PC browsers.
- Administrators can create, edit, duplicate, import and export views.
- If enabled by the Administrator, end users can select a different channel to play from the list of available channels.

Client Access

- Access to an ArtioMultiview channel view is via a Windows PC and browser.
- Access is controlled with a floating client license.
- Each ArtioMultiview application comes with a license for up to 10 clients to simultaneously access views. Extra client licenses can be purchased to extend access.

Templates

- Four standard templates are supplied with ArtioMultiview and the administrator can define extra templates as required.
- Edit name, import and export view templates.
- Templates in simple format for flexible editing.

Requirements

- ArtioMultiview Configurator.
- ArtioMultiview must be licensed separately and can be activated as part of AvediaServer m8115, m7205, m7305 or m8365 Software.

ArtioMultiview Clients

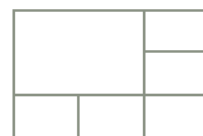

- Windows PC minimum requirements.
 - i7 processor, 16 GB RAM, high performance PCIe 3 graphics card (eg NVidia GTX 650Ti or similar)
 - 64-bit Windows 7 or later and 64-bit browser (eg IE 64-bit or WaterFox 64-bit)
