Harness the power of video to Educate, Communicate and Entertain throughout your campus

Are you looking to:

- Improve internal communications by providing information, news, entertainment, radio and foreign language channels around campus?
- Give teachers and students instant access to course and study materials?
- Manage thousands of hours of educational programming using video-on-demand?
- Stream live events, such as graduation ceremonies, around campus as well as via the internet to relatives and friends?
- Match TV channels to students' interests and educational needs in student accommodation?

Introducing Exterity IP video solutions

Exterity IP video solutions are deployed in leading educational establishments around the world. From live streaming of lectures and foreign language channels, to campus-wide digital signage and student accommodation entertainment, our end-to-end solutions help you to provide a first class educational experience.

University College London uses Exterity IP video to deliver learning materials live and on-demand to its students

University College London (UCL) prides itself on being one of the most innovative learning centres in the world and it was vital to enhance departments with cutting-edge technology that reflects this.

Students learning any of the 18 languages on offer at UCL can access the Exterity IPTV system from any PC in the department and view live TV and an unlimited global archive of recorded material.

"Students benefit from watching live TV direct from foreign countries as they can see the language they are studying being used naturally, and learn about that country's culture, adding an extra dimension to the learning experience."

Sibylle Nalezinski

IT & Multimedia Support Officer UCL

Bath University provides a home-away-from-home TV and video experience for its students

Facilities in student accommodation play an increasingly important role in young students' decision to join a particular university and their expectations are high. With more media becoming accessible at the tap of a finger, students are also expecting to be able to access high quality video content easily from any location.

As part of its ongoing commitment to state-of-the-art audiovisual provision and student satisfaction, Bath University deployed an Exterity IP video system to deliver a full TV and video entertainment solution across its student accommodation and university campus.
